

WARNING

ALL required health papers must accompany the cattle and be available for inspection upon arrival. Cattle will not be health tested on the facility grounds for the purposes of showing. World Dairy Expo staff, with assistance from the Wisconsin Department of Agriculture, Trade and Consumer Protection (DATCP), United States Department of Agriculture and the University of Wisconsin-Madison School of Veterinary Medicine, will check all papers. Animals will not be allowed on the grounds until health papers have been verified.

Please bring a printed copy of all health papers to turn in upon arrival.

Cattle without health papers:

- 1) Will be placed in a quarantine area until proper health papers are presented OR**
- 2) Will be required to leave the grounds**

Highly Pathogenic Avian Influenza A (HPAI/H5N1) Testing Requirements

HPAI/H5N1 continues to be detected in dairy farms in the United States. As a result, federal and state orders requiring testing remain in effect. The required test for HPAI/H5N1 is an Influenza A PCR, and testing details will refer to Influenza A throughout this document. Requirements for Influenza A testing are subject to change. A USDA Federal Order dated April 24, 2024 and a WDATCP order effective June 19, 2024 require a negative Influenza A PCR test on milk samples of all lactating dairy cattle with a collection date within 7 days of interstate and Wisconsin, intrastate, movement. The test collection date, lab, accession number, and result must be written clearly on the CVI. A second test is not required by the federal order for cattle to return to the farm of origin from a show or exhibition if the event does not exceed 10 days in length. Contact your state for requirements to return home after the show.

https://datcp.wi.gov/Pages/Programs_Services/AvianInfluenzaCattle.aspx

Identification Requirements

All cattle attending World Dairy Expo must have official individual identification regardless of age. Acceptable forms of animal identification are: a USDA AIN 840 RFID tag, a Canadian AIN RFID 124 tag, or, if applied prior to November 5, 2024 a USDA AIN 840 visual only tag.

***NEW for 2025: Official identification applied after November 5, 2024 must be electronic (RFID) AND visually readable. Cattle with USDA 840 visual only tags applied before this date may continue to use that tag for the rest of that animal's life.**

Paperwork Requirements

All cattle must have a printed certificate of veterinary inspection (CVI, also known as a health certificate) documenting official animal identification and Influenza A test collection date, lab, accession number, and result. A printed copy of each lactating animal's negative Influenza A test results is also required.

Cattle from Texas and Michigan's Federal TB Free Zone

As long as you are not involved in any TB-positive or exposed herd investigations, here's what you need to bring in cattle from these states:

1. You must have a printed, Certificate of Veterinary Inspection (CVI, also known as a health certificate) with an inspection date within 30 days of arrival to World Dairy Expo.
2. Each animal must be officially identified as stated above in Identification Requirements. There is no age or sexual status exemption for the ID requirement.
3. Influenza A: A USDA Federal Order dated April 24, 2024 requires a negative Influenza A PCR test on milk samples of all lactating dairy cattle with a collection date within 7 days of interstate movement. The test collection date, lab, accession number, and result must be written clearly on the CVI. A printed copy of each lactating animal's negative Influenza A test results is also required.
4. Tuberculosis: Each animal needs either a negative individual tuberculosis test within 60 days prior to the date of import to Wisconsin or, if the animals originate from a currently accredited TB-free herd, individual TB tests are not required, but the accreditation number and the date of the last whole-herd TB test must be on the CVI. A whole herd TB test is not required if the animals are individually tested. There is no age or sexual status exemption for the TB test requirement.
5. A brucellosis test, vaccination or statement is not required at this time.
6. No other tests or statements are required at this time.
7. An import permit is not required.
8. If there is a current vesicular stomatitis diagnosis or quarantine in the state of origin, effective May 30, 2014, Wisconsin no longer requires a permit or special statements.
9. If the animals will be offered for sale, they must meet the requirements listed in the World Dairy Expo premium book.

Cattle from Michigan's federal Modified Accredited (MA) Zone

These rules apply to cattle from the following Michigan counties: **Alcona, Alpena, Montmorency and Oscoda**. The import regulations for Michigan's MA Zone are the same for World Dairy Expo as they are for other cattle imports, with the exception of the show-only statement (see item 1 below):

1. You must have a current certificate of veterinary inspection (CVI, also known as a health certificate). The CVI must include a version of the following statement: "This animal is/ these animals are coming to World Dairy Expo only and will return to the state of origin after Expo."
2. Each animal must be officially identified as stated above in Identification Requirements. There is no age or sexual status exemption for the ID requirement.
3. Influenza A: A USDA Federal Order dated April 24, 2024 requires a negative Influenza A PCR test on milk samples of all lactating dairy cattle with a collection date within 7 days of interstate movement. The test collection date, lab, accession number, and result must be written clearly on the CVI. A printed copy of each lactating animal's negative Influenza A test results is also required.
4. Tuberculosis: Each animal must have a negative individual TB test within 60 days before the date of import and originate from a herd that has had a negative whole-herd TB test for all animals one year and older within the last 12 months. The injection dates of both tests must be written clearly on both the import permit application form (see #4) and the CVI. There is no age or sexual status exemption for the TB test requirement.
5. An import permit is required. The import permit application form is available from: https://datcp.wi.gov/Pages/Programs_Services/WorldDairyExpo.aspx, or you can have it faxed to you by calling (608) 224-4874 during regular business hours. Fill it out completely – all the boxes marked with an asterisk are required. You will need to write in the Alliant Energy Center's livestock premises code, which is 004A6S7. Import permit applications without the livestock premises code will not be processed. Note: The "applicant" who signs the form can be the owner, or it can be the veterinarian or someone from the vet clinic staff – it doesn't have to be the owner. When the form is completed, fax or email it, along with the signed and dated CVI, to (608) 224-4871 or DATCPAnimalImports@wisconsin.gov. When the import permit is approved, a permit number will be issued by a Wisconsin state veterinarian and provided back to requestor. The permit number must be written on the CVI.
6. A brucellosis test, vaccination or statement is not required at this time.
7. No other tests or statements are required at this time.
8. If there is a current vesicular stomatitis diagnosis or quarantine in the state of origin, effective May 30, 2014, Wisconsin no longer requires a permit or special statements.
9. If you intend to sell animals at Expo, you may do so only if the animals return to their state of origin after the show (as stated on your certificate of veterinary inspection). The animals may then travel to their new owner with a new CVI. Make sure the animals meet the import requirements of the state of destination. Please consult the World Dairy Expo premium book for any additional testing requirements.

Cattle from All Other States

For animals from the states that aren't listed above, the import requirements are the same as for other cattle imports.

1. You must have a current Certificate of Veterinary Inspection (CVI, also known as a health certificate).
2. Each animal must be officially identified as stated above in Identification Requirements. There is no age or sexual status exemption for the ID requirement.
3. Influenza A: A USDA Federal Order dated April 24, 2024 requires a negative Influenza A PCR test on milk samples of all lactating dairy cattle with a collection date within 7 days of interstate movement. The test collection date, lab, accession number, and result must be written clearly on the CVI. A printed copy of each lactating animal's negative Influenza A test results is also required.
4. Tuberculosis testing is not required at this time.
5. A brucellosis test, vaccination or statement is not required.
6. No other tests or statements are required at this time.
7. An import permit is not required.
8. If there is a current vesicular stomatitis diagnosis or quarantine in the state of origin, effective May 30, 2014, Wisconsin no longer requires a permit or special statements.
9. If the animals will be offered for sale, they must meet the requirements listed in the World Dairy Expo Premium Book.

Cattle from Outside the United States

To bring in cattle from outside the United States, you will need to meet the import requirements established by the United States Department of Agriculture. You can learn more at the website for the National Center for Import and Export (NCIE), <https://www.aphis.usda.gov/aphis/ourfocus/importexport> or by calling the NCIE at (301)851-3300.

All testing requirements are subject to change. For the most current testing information for cattle attending the show only, please go to https://datcp.wi.gov/Pages/Programs_Services/WorldDairyExpo.aspx

General Notes

All cattle exhibited must be free of contagious and infectious diseases, including ringworm, scabies, mange, warts and pinkeye. Cattle under quarantine are not eligible for exhibition. Cattle that come from an area which is considered to be quarantined because of the presence of or exposure to a highly contagious disease cannot be shown at World Dairy Expo. Expo or DATCP have the right to require such tests and examinations as may be necessary to determine the disease status of any animals exhibited, and to exclude or remove, under a permit from DATCP, any animal afflicted or suspected of being afflicted with any contagious disease.

Drug usage: Cattle at the show may only be treated with USDA-licensed FDA-approved drugs. Withdrawal time periods must be strictly observed. Extra label use of all drugs must be under the direction of a licensed veterinarian. Evidence of same shall be provided in writing if requested by Expo or DATCP.

- World Dairy Expo Exhibitor Guidelines for Animal CVI and Influenza A Testing -

Things You Need To Know

1. You will need a current Certificate of Veterinary Inspection (CVI) for all animals coming to WDE.
2. Individual lactating cows will also require a negative Influenza A milk sample to get into Expo.
3. In order to return home from Expo, you must work closely with your veterinarian and your State's Animal Health Officials (SAHO) to develop a plan that will not require a routine Influenza A test to be done at Expo.
4. To help accommodate travel guidelines, Expo will permit early departures.
5. Veterinary services will be available at Expo as they always have been.
 - a. If the WDE Vet Team identifies an animal showing clinical signs that warrant an Influenza A test, the milk sample PCR test will be administered.
6. It is possible that additional testing requirements for animal movement across the Canadian border, interstate within the US and intrastate in WI will change between now and your departure for World Dairy Expo.

Planning Your Trip To Expo

Exhibitors must understand your state's and the federal Influenza A testing requirements for interstate travel, including your trip to and return from Expo.

1. Work with your herd veterinarian and State Animal Health Office (SAHO). Identify when:
 - a. The date that a milk sample collection will need to occur for a negative Influenza A test to meet federal interstate and Wisconsin entry requirements.
 - b. Anticipated date to receive Influenza A milk sample test results.
 - c. Identify the [National Animal Health Laboratory Network \(NAHLN\)](#) or [Canadian Animal Health Surveillance System \(CAHSS\)](#) lab the milk sample will be tested at, when samples are accepted and run, and how long it typically takes to get results.
 - d. Date of planned departure to Expo.
 - e. Date of expected arrival to Expo.

Planning Your Trip Back Home from Madison

Work with your herd veterinarian and SAHO for any federal or state regulatory requirements based on:

1. Departure date from Expo.
2. Date of expected arrival back home

Expo will allow early departures only to allow you to meet Influenza A test requirements without another test to return home.

Animals are eligible for early release if they meet the following criteria:

1. If you have lactating dairy cattle (no heifer-only groups are eligible).
2. If your travel and exhibition time at World Dairy Expo would meet one of these two requirements:
 - a. If your travel and exhibition time will exceed the USDA order which states that, "animals may travel to their home herd using the same negative test result [that they came in on], provided the exhibition, show or sale does not exceed 10 days of length and a new test would be required.
 - b. If your travel and exhibition time will exceed your local state or provincial order of a shorter length of time (ex: 7 days) on the same negative test and a new test would be required.
3. If your non-lactating cattle are traveling with lactating cattle that would be outside of travel time granted by the USDA or state, they are eligible to leave.
4. Proof of testing and travel time is the burden of the dairy cattle exhibitor.
5. You must have at least one lactating animal that arrives on-grounds at World Dairy Expo, to be eligible.

Home State & Federal Influenza A Test Requirement Responsibility

Exhibitors must understand your state's and the federal Influenza A testing requirements for interstate travel, including your trip to and return from Expo.

1. Early departure, exhibitors must register an early departure date so breed superintendents and Expo show staff can plan accordingly. You may do this with your entries or by September 18, at the latest.
2. Request Link in the Dairy Cattle Show Exhibitor Dashboard:
<https://forms.gle/jGwuAtXnJiBKVq3e8>
3. Departure Time: at the conclusion of their breed show (or after 6 p.m.) until 12 a.m. midnight.
4. WDE will provide written confirmation of confirmation or denial to the email address provided with request.
